Atlantic Management Resources

Healthcare Recruitment that Delivers Results

For recruitment you can trust, trust AMR.

Whether you require one person or a sales force of 400,

Atlantic Management Resources (AMR) can help you fill

crucial positions in your healthcare organization.

AMR is a search firm you can trust for all the right reasons:

Focus: *Healthcare is our business – our only business.*

AMR specializes in the healthcare industry. We recruit nationwide on all levels of the sales vertical – from entry-level sales and marketing positions to senior managers and vice presidents – for Fortune 500 healthcare giants, as well as small and mid-size companies.

Our researchers and recruiters are experienced in healthcare. They understand different therapeutic areas, the importance of reimbursement and various specialties. They know the industry and the people in it. They know what questions to ask and what it takes to do the job. Most of all, they know how and when to listen.

Track Record: *Growth based on reputation and referral.*

Since 1990, AMR has placed nearly 2,000 sales and marketing professionals. But we do more than place people. We build long-term relationships with the companies we serve. As a result, many clients have been with AMR for more than a decade.

Methodology: *AMR digs deeper.*

Our multi-pronged approach achieves a successful recruiting match. AMR professionals mine our database, work the Internet, network with associated recruiters nationwide, and prescreen candidates.

For hard-to-fill positions in hard-to-place locations, many recruiters don't actually recruit anymore. AMR does. We go beyond our database, the Internet and our recruiter network and do the necessary old-fashioned recruiting. We go into the territory and "work it" – talking to doctors, pharmacists and hospital personnel. In short, we do what it takes to find qualified candidates and present the best to you.

Resources: *AMR gives you depth and reach.*

When you select AMR for your recruiting assignments, you get a partner with exceptional resources:

- A database of 50,000 candidates
- A professional staff of researchers and recruiters
- A referral network that generates a constant stream of candidates
- A nationwide network of associates and affiliated agencies
